WHO WE ARE

BioKrop Project is an initiative of a consortium of various single-origin specialty coffee microlot coffee farms across the six mountain regions of El Salvador, Central America. All the coffee producers are small and medium size and work in coordination under the technical advisory of TIERRA BENDITA, S.A. DE C.V.

WHAT ARE WE LOOKING FOR

We are looking to forge long term alliances with buyers that share our passion and our vision for coffee.

Our vision for the industry:

- Sustainability
- Social Responsibility
- Better livelihood for farmers and their families
- Environmental and fauna protection
- Shared Benefits

WHAT DO WE OFFER

We offer various specialty coffee varieties including Pacamara, Bourbon, Pacas, San Pacho, and Caturra among others. This is from traceable origins starting with our own shade grown coffee farms.

We are also able to offer you special orders such as natural, washed, semi-washed and honey coffees.

We provide you traceability of the coffees that are being processed just for you!

WHAT'S NEXT

Contact us and we would love to invite you to come and taste our coffee. We will assist you in making your travel arrangements and hotel accommodations so your visit is as enjoyable and stress-free as possible. We can arrange for cuppings and a visit to our microlots. Including our hotel boutique Amatechan. Come and find out why we are so passionate in what we do. Your comments or suggestions are appreciated.
